

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THE
BRITISH PRONOUNCING
AND
SELF INSTRUCTING
SPELLING BOOK,

ON A PLAN ENTIRELY NEW;

Containing nearly Twenty Thousand Words in common use, and comprising every radical word in the English language, alphabetically arranged in a series of progressive sections, accented and divided as pronounced, and adapted to the capacities of every class of learners;

WITH A KEY,

In which all the anomalies of the language are exhibited at one view, and by referring to which the learner can (with the utmost facility) acquire the pronunciation of every irregular or difficult word.

INTENDED FOR THE USE OF SCHOOLS AND
PRIVATE TUITION.

BY G. COYSH,
SCHOOLMASTER.

TOPSHAM:

SOLD BY G. POPE, AT THE DEPOSITORY, HIGH-STREET.

Price 1s. 6d.

1837.

ENTERED AT STATIONERS' HALL.

EXETER:
PRINTED BY T. LATIMER.

P R E F A C E.

To facilitate the improvement of the Pupil by the simplest and most easy methods, should be an object with all Tutors and authors of elementary works; and as a correct pronunciation is of paramount importance, which the irregularities of our language render difficult to attain, and which no verbal instruction nor general rules can effectually accomplish, it appears remarkable that no very decided efforts in books of an elementary character have been made to obviate these difficulties. It is true there are some in which the words are classed according to their accent, and in others some few directions are given as to the sound of certain letters; but there is not one, I believe, in which these two points are united so as to afford the learner the requisite facility. This will, I trust, be accepted as my apology for the present publication. Every observant instructor has, I presume, noticed the propensity of their pupils to sound, or endeavour to sound, every letter in words which they know not how to pronounce correctly—but in many words some letters are silent, while others vary from their true or alphabetic sound;

hence to sound the silent, or to give the alphabetic sound to those letters which vary from the true, destroys the pronunciation of the word in which they are found. To remove these difficulties I have classed under the heads *Regular* and *Irregular* every word necessary to enable the learner to read or pronounce with propriety. Under the former will be found all words in which *c* has a hard sound, as in *cake*, *g* in *gun*, *ch* as in *church*, and every other letter its common full pronunciation. Under the latter (the irregular) are arranged all words in which are found letters which either are not sounded, or which have an uncertain sound, and to which consequently a learner may give a wrong pronunciation. The words in this class have marks attached to them, by means of which, on a reference to the Key, the learner will be enabled to give to every word its correct accentuation; and if he be made to write on a slate or paper the words that form his spelling lesson according to their pronunciation, and to read them correctly, it will be found a great advantage: thus, for example, *aisle*—the *a* and *s* being printed in italics will be omitted, and the correct pronunciation remain *ile*; *bäld*—*aw* being substituted for *a*, as shewn by the mark, leaves the word *bawld* as it should be pronounced; *†chaßm*—*k* for *ch*, and *z* for *s*, as directed by their marks, leave the corrected word *kazm*; and so on throughout the book. Participles and words generally spelt as two syllables but pronounced as one, words of three syllables as two, &c. form separate sections; as do also words which, though spelt the same, are of different parts of speech, or

differently pronounced; to explain these peculiarities will of course be the duty of the tutor, who will make his pupil so clearly understand them as will prevent his using them erroneously on any occasion. Words of six, seven, and eight syllables, merely placed in their alphabetic order, and which constitute the last section, are designed to exercise the pupil, by his being required to select such words as bear a particular accent from the others. From the whole it will be seen that the object I have in view is to combine correct spelling with a correct pronunciation; and from the experience which twenty years' devotion to the instruction of youth affords, I think I am justified in saying that whoever learns this book perfectly will neither spell nor pronounce a word wrong. While the tutor will derive great assistance from this compilation, by being enabled, from the variety of its sections, to apportion the task according to the capacity of his pupils, and be saved the trouble of teaching them the correct pronunciation, the mental energies of his scholars will be called into action—and they will be enabled by their own diligence to overcome the almost insurmountable difficulties of our language. I am aware that much in this publication may, by superficial observers, be deemed unnecessary; but it must be remembered that it is intended principally for children, on whose minds correct impressions cannot be too early nor firmly fixed. In the compilation of this work it will be satisfactory to the public to know that the authorities for pronunciation which I have used are those which have long enjoyed the public favor, though the principle on

which I have rested is Walker's Dictionary. To render the work as complete as possible, I have added (page 9) a specimen of Exercises as a directory which will, I trust, be found useful. I now submit this little book to the decision of an impartial and judicious public, and particularly to those on whom the arduous task of tuition devolves.

G. COYSH.

Topsham, December, 1837.

TESTIMONIALS.

FROM THE REV. DR. MILLS,
HEAD MASTER OF THE FREE GRAMMAR SCHOOL, EXETER.

" School House, Exeter, January, 1836.

" My dear Sir,

" Mr. Coysh called on me on Saturday to explain to me his method of teaching spelling on a new and improved plan. It appears to be ingenious; and as it begins and proceeds systematically upon a fixed principle, will, I think, effect the object which he has in view. If I may judge from the very indifferent spelling of most boys, and many grown up persons, the present system of teaching must be very deficient, and any improvement upon it which Mr. Coysh's plan promises, will be a public benefit; and, as I hope, an advantage to the ingenious and laborious Author. I am glad to find that the proposed price of his Book will not exceed that of other Spelling Books.

" I remain, my dear Sir,

" Very sincerely yours,

" Rev. H. Thorpe, Topsham.

" WILLIAM MILLS."

FROM MR. GOULD,
MASTER OF THE BLUE BOYS' SCHOOL AT ST. JOHN'S HOSPITAL.

" The method which Mr. Coysh has adopted of accenting and marking the words in his proposed Spelling Book, appears a great improvement; and with proper attention in instructing, must be decidedly advantageous to Pupils.

" St. John's Hospital, January, 1836.

" G. M. GOULD."

FROM MR. SQUANCE,
LIBRARIAN TO THE DEVON AND EXETER INSTITUTION.

"Devon and Exeter Institution, Feb., 1836.

"Sir,—The specimen of your Spelling Book appears to me a great improvement on those now in use, and well calculated to remove many difficulties. The progressive way in which the learner should be led on has long been wanting, which I think your plan will accomplish.

"Your's, truly,

"JOHN SQUANCE, LIBRARIAN."

"Mr. Coysh, Topsham."

FROM MR. QUICKE,
MASTER OF KING'S LODGE ACADEMY, EXETER.

"King's Lodge Academy, Exeter, February, 1836.

"Sir,—As far as I may be able to give an opinion, from the *coup d'œil* that I had of your intended publication, I take leave to say that I admire the principles upon which you have prosecuted your plan. I express my unfeigned sentiments when I state that, as an elementary work, I deem it a desideratum, and I believe it eminently qualified to facilitate the attainment of correct spelling: I commend your Vocabulary for this particular feature, the simplicity of the manner whereby you unite the rudiments of orthoepy with orthography. My inspection of the manuscript was certainly restricted, but I saw sufficient to induce me to promise that your book shall have an introduction into my establishment as soon as it emanates from the press. You are at perfect liberty to make what use you please of this address from

"Your obedient servant,

"Mr. Coysh, Topsham.

"THOMAS QUICKE."

OBSERVATIONS.

A'men' is the only word in the language that has necessarily two consecutive accents, on each of which an equal stress of the voice must be laid.

The words Boatswain, Buoy, and Cockswain, are technically pronounced as they will be found corrected in their respective places, Bo-sen, Boy, Cock-sen; but to those who are not of the Naval profession it would be advisable, when they read these words, to pronounce them distinctly as they are written.

Of, when alone, has the sound of ov; but when united to, or forming a syllable of other words, it takes its natural sound, as in hereof, often, &c.

Ph has the sound of v in Nephew and Stephen only; in almost every other word it assumes the sound of f.

Q has always the sound of k, and is constantly followed by u, pronounced like w, as in quack, quârt, &c, pronounced kwack, kwort.

Th, in with, has the flat sound when the word stands alone, as also when it is prefixed to other words, as withhold, withstand; but when it follows a word, as in herewith, therewith, &c. it has the sharp sound, as in think. In all words in which it has the flat sound the th is printed in small capitals.

Y having generally the same sound as i would have in the same situation, I have in most cases marked it as i in the irregular spelling where it should take the short sound.

As in many irregular words the pronunciation cannot be obtained by forming the letters into syllables, as a-pron, bagn-io, col-o-nel, &c. I would suggest the propriety of the irregular words being lettered only by pupils, when spelt as a-p-r-o-n, a-purn, b-a-g-n-i-o, ban-yo, c-o-l-o-n-e-l, kur-nel, &c.

. As errors will unavoidably accompany the first impression of a complicated work, the Public are respectfully requested on their meeting with inaccuracies to turn to the list of errata at the end of the book.

DIRECTIONS FOR EXERCISING.

The learner to rule his slate as in the preceding form; copy his lesson from the book into the left hand column, then refer to the Key for information to correct, omitting every mute or italic letter in a word, and changing the marked letters and syllables, as directed, he will then have the true pronunciation to be set opposite its correspondent word in the right hand column. When called on to repeat, the words as spelt are to be obliterated, the pupil giving himself the lesson from the pronouncing column, and spelling correctly from memory.

Note—To whatever word of one syllable, or syllabable of a word this ? note of interrogation is affixed, reference must be made to such word or syllable in the key for its sound, and not to the nearest letter as with the other marks.

Words in which c is sounded soft like s.

Note.—In words where two or more c's are found, and when c terminates a syllable, those having the soft sound of s are distinguished by the key mark placed next or near to it, at the beginning or end of the word or syllable, as in chance*, ac*-id, con-*ceive, &c. This observation is applicable to all the subsequent sections, under g like j, s like z, &c.

Ace	cent	dance	fleece	Juice	ounce

Words constituting the same and different parts of speech, spelt alike, but differently pronounced.

Note.—The letters, &c., placed after the words denote their parts of speech, &c. as *a* for adjective, *s* for substantive, *v* for verb, *part* for participle, *pro* for pronoun, *sing* for singular, *plu* for plural. The tutor will explain.

bass, <i>s</i>	bass, ' <i>s</i>	my, <i>pro</i>	mÿ, <i>pro</i>

mouth, <i>s</i>	mouth, <i>v</i>		

Words of two syllables generally pronounced as one, except when they occur in scripture reading, and in which the termination, ed. is not preceded by a vowel, they should then be read as two syllables.

Note.—This mark § at the end of a word, shows that when it is pronounced as one syllable, the terminating *d*, or *ed*, assumes the sound of *t*. The tutor will explain.

◆

Words (Regular) of Two Syllables, accented on the first.

Note—"Accent is the laying of a peculiar stress of the voice on a certain letter or syllable in a word, that it may be better heard than the rest, or distinguished from them, as in the word *a-base*, the stress of the voice must be on the letter *a*, and second syllable *base*, which takes the accent."—MURRAY. The tutor will explain.
